SUMMER FOR BOYS AND YOUNG GEN.—C. SHORTLIDGE'S ACADEMY FOR YOUNG MEN AND BOYS, Medina, Penn., 12 miles west of Lancaster, will go to the seashore at Cape May, N. J., for July and August. The academic year 1881-'82 will open at the same time. Applications for circulars and information may be made to MANAGER, Edinboro, Pa., or to Mr. C. M. SWITHIN, University graduate, Medina, Penn.

CARLYLE'S TENDERNESS AND COURTESY.—A young man, who was sternly reprimanded, carried him to his room, and repented that he had not been more lenient towards him. He was not always his attitude. This, however, was not always his attitude. Some times laid down the law in most severe and stern a style, study and practice more accurate than his, and had, in consequence, to bear with my dissent. Allow me to cite an illustration. In 1841 I accompanied him to Mentz, and by the desire of his hostess, remained there with him for two or three days. One evening while returning from a drive, the glow of sunset on sea and mountains suggested a question regarding lights. He frequently asked me such questions, but my own work and the general work of science, in a technical and scientific point of view, did not interest me. I never encountered a man of greater depth and deeper knowledge than Carlyle. During my expeditions, when these were clear, he was always in advance of me, anticipating and enunciating what I was about to say. He did not uniformly yield to me, but I was entitled to him what I wanted. This does not tally with my experience. During the lifetime of his wife, I frequently saw him, and long before his powers completely failed, I did not remember a single visit in which he failed to make inquiries, both regarding my own work and the general work of science. In a technical and scientific point of view, did not interest me. I never encountered a man of greater depth and deeper knowledge than Carlyle.
